

Applications specialist

Organisation

Vertec Scientific

Description

Vertec Scientific Limited has a very long track record of successfully representing the best medical equipment manufacturers. We have an excellent opportunity for an experienced applications specialist.

Job role

Your responsibilities will include:

- On-site and video conferencing customer applications training for use of Hologic bone densitometers and Insight mini C-arm systems as well as ongoing telephone and email support;
- Customer support on applications issues on both DXA scanning and use of mini C-arm. In addition, support of the interpretation of DXA scans and faults;
- Liaising with sales and service departments to ensure training is carried out efficiently;
- Updating protocols for training, including up-to-date guidelines from professional bodies.

Person specification

- Home office-based with extensive travel to client sites all over the United Kingdom as necessary;
- Flexibility in hours worked;
- Full-time position, five days per week.

Skill and experience required

- Degree or equivalent;
- Four to five years' experience as radiographer with relevant specialist experience in Vertec industries;
- Technical training experience;
- Qualified to industry level in order to award CPD points;
- Radiation protection knowledge;
- Strong professional presentation skills focusing on small group environments;
- UK driving licence;
- Eligible to work in the UK.
